Clematis[®] Pro

Supreme comfort | Effortless adjustability | Compact design

An evolution in tilt-in-space passive wheelchairs

Our new Rea Clematis Pro has been designed to enhance the experience for both client and care giver. It's perfectly suited for those individuals who need the support and comfort of a tilt in space wheelchair. Part of our market leading Rea Passive range, the Clematis Pro offers a high level of postural support, with 25° of seat tilt and 30° of backrest recline for effortless repositioning. A wide range of accessories helps deliver exceptional comfort, support and stability for those who spend large amounts of time in their wheelchair.

Supreme comfort backrest

The rigid plastic backrest shell is height adjustable and incorporates 30° of backrest recline offering a high level of support where it's needed. The addition of the Laguna backrest cushion with added lateral support, ensures a comfortable and stable sitting position.

DSS® (Dual Stability System)

The unique weight shifting technology DSS, ensures excellent stability of the wheelchair. When tilted and reclined, the seat moves forward keeping the clients weight in the footprint of the chassis, ensuring maximum safety and increased confidence.

Compact design

The compact frame design offers superb manoeuvrability, especially indoors. The rear wheels have been moved forward to allow better access to the handrims for those who can propel themselves.

7

FEATURES

1 Adjustable backrest

- ▶ Quick and easy to set up and adjust to individual needs
- ▶ Backrest cushion with lateral support for added comfort
- ▶ Precise fit for a range of postural requirements

2 Larger seat tilt

- ▶ Max seat tilt of 25°
- ▶ Ensures improved pressure redistribution
- ▶ Reduces shear forces

7 Width adjustment

- ▶ The double armrest receiver offers width adjustment of 5 cm as standard
- ▶ Increased space in the seat area

3 Adjustable seat plate

- ▶ Adjustable in depth

6 Dual Stability System

- ▶ Enhanced stability in every tilt and recline position
- ▶ High pivot point to minimise shear forces.

5 Compact frame

- ▶ Easy to manoeuvre in the tightest of spaces
- ▶ Optimised for indoor use
- ▶ Anti-tippers to improve safety

4 Angle adjustable legrests

- ▶ Allows the legrest to be elevated for comfort when in a tilt and/or recline position
- ▶ Height and depth adjustable calfpad
- ▶ Height, depth, angle and width adjustable footplate to find the perfect position for the feet

Additional features

- ▶ **New concave armpad**
 - The one piece moulded concave armpad ensures the arm stays in position throughout the tilt and recline movements.
 - Easy to clean for better infection control
- ▶ **New style Laguna backrest cushion**
 - Improved comfort and postural support

Range of other options include

- Table tray
- Transportation kit
- Removable pommel
- Adjustable Trunk supports
- Tilt lock mechanism
- Foot operated brake (Transit only)
- Headrest cover
- Footplate cover
- Spokeguards
